COMPANY PROFILE

In 2009, we set up a factory to produce accessories for some big manufacturers. 5 years later, We designed to do some our own things. Since then we start to produce transport trolleys/ carts and chafing dishes. By 2018, Our GN pans & steam pans workshop was beginning until now. Focus on EU market.

Two workshops, one is focus on transport trolley & chafing dish, another is specialized in GN pan&steam pan.

Trolley & Chafing dish workshop

GN Pan & Steam Pan workshop

Why Choose Us?

Frustrated by poor quality, unhelpful service and a lack of information, Steelwel was set up to design and produce better trolleys, racks, pans etc transportation system.

The idea is to supply great quality products -- in a friendly manner, at insanely attractive prices -- same day, if necessary. We are focused on expanding our range intelligently and honestly. Over the years we've rapidly increased the number of products we sell, often prompted by the good ideas of our customers. But that doesn't mean we sacrifice quality. The Steelwel mission is to give better quality products that are more useful and easier to assemble, all at cheaper prices. If you find a cheaper product, it will more than likely be an inferior product.

Buffet Ware
Simple chafing dishes
Induction Chafing dishes
Hydraulic Chafing dishes

GN Pans
Steam Pans
Gastronomn Pans

Service Trolley
Cleaning Cart
Rack Trolley
Servierwagen
Regalwagen

STABLE TROLLEYS.

The Products Made Of Premier Stainless Steel
They can certainly take a lot

In the food service industry, hotel and the catering industry, things can get hectic during rush hours: day in, day out, huge numbers of dishes need to be transported. As quickly as possible

The perfect size for all: the serving and cleaning trolleys for transport, temporary storage and stocking. Also available custom for large capacities in the XXL version with additional shelves.

Ready for anything - the serving and transport trolleys by STEELWEL Professional. With an extra sturdy design and high-quality processing, they transport everything that is loaded onto them - light and easy to manoeuvre, regardless of how far it needs to go.

Superior quality in multi-fuction-Steelwel rack trolleys

Whether it's transport, temporary or long-term storage - the Steelwel rack trolleys will make anyone happy. Rack trolley are ideally suited for storing and transporting GN containers, serving salads and desserts or portioning on conveyor belts.

GN PAN

Gastronomn sizing was invented to provide an industry standard for pans and other kitchen equipment. The term, also known as gastronomical-normal, originated in Switzerland and is now widely used across most European countries. The main intention of the sizes was to promote flexibility in every kitchen and allow individual containers to be used with or transferred to a variety of appliances. Gastronomn sizes are comparable to American sizes and can generally be interchanged. Here's a list of the standard gastronomn (GN) sizes:

SIZE	Depth (MM)
GN1/9	20mm 40mm 65mm 100mm 150mm 200mm
GN1/8	20mm 40mm 65mm 100mm 150mm 200mm
GN1/6	20mm 40mm 65mm 100mm 150mm 200mm
GN1/4	20mm 40mm 65mm 100mm 150mm
GN1/3	20mm 40mm 65mm 100mm 150mm
GN1/2	20mm 40mm 65mm 100mm 150mm
GN1/2 Long	20mm 40mm 65mm 100mm 150mm
GN2/3	20mm 40mm 65mm 100mm 150mm
GN Full	20mm 40mm 65mm 100mm 150mm

Depths

Food pans come in a variety of depths and are often purchased primarily based on personal preference.

Most Common Depths: 100, 150, 200
Additional Depths: 25, 50, 75, 125, 175, 225
